

Description

Application

In the suction line of pumps of hydraulic or lubricating circuits.

Performance features

Protection against

malfunction:

By full-flow filtration in the suction line, particularly the pumps are protected from coarse dirt particles that have remained in the system after manufacture or repair, or enter the system when it is filled with oil.

Special features

The robust construction with end caps, inner core, and mesh screen material, all out of metal, offers the following advantages:

- Maximum reliability at increased operating temperatures
- Enormous shock and vibration resistance

Construction

Flow direction from outside to center. The star-shaped pleating of the filter material results in:

- large filter surfaces
- low pressure drop
- long service life

Filter maintenance

• Cleaning in ultrasonic bath for a few minutes. As an alternative, put suction filter in cleaning agent for approx. 15 minutes and remove dirt from the outside using a brush.

- Then flush with fresh cleaning fluid from the inside to the outside.
- Blow out with compressed air from the inside to the outside.

In any case, be careful that no dirt enters the inner side (clean oil side) of the suction filter.

Remarks:

The filters listed in this chart are standard filters. Other designs, e.g. other filter finenesses, available on request.

Diagrams

$\Delta p\text{-curves}$ for filters in Selection Chart, column 3

Dimensions

Symbols

Characteristics

Nominal flow rate

Up to 92.5 gpm (see Selection Chart, column 2) The nominal flow rates indicated by ARGO-HYTOS are based on the following features:

- Pressure drop $\Delta p < 0.51$ psi at $\nu =$ 162 SUS
- closed by-pass valve at $\nu \leq$ 930 SUS
- flow velocity in the connection lines \leq 4.9 ft/s

Connection

Threaded ports according to ISO 228 or DIN 13. Sizes see Selection Chart, column 7 (other port threads on request).

Filter fineness

100 µm

ISO 2943

Hydraulic fluids

Mineral oil and biodegradable fluids (HEES and HETG, see info-sheet 00.20)

Temperature range

- 22 °F ... + 212 °F (temporary - 40 °F ... + 248 °F)

Materials

- AS 010-00 / AS 025-01 / AS 040-01 / AS 060-01 / AS 150-01 End caps out of steel, support mesh out of steel, zinc plated, filter mesh out of stainless steel (1.4301)
- AS 080-01 / AS 100-01 End cap with hexagon out of aluminum, bottom end cap out of steel, support mesh out of steel, zinc plated, filter mesh out of stainless steel (1.4301)
- AS 040-71 End caps out of steel, filter mesh out of stainless steel (1.4301)
- AS 080-81 / AS 100-81
 End cap with hexagon out of aluminum, bottom end cap out of steel, filter mesh out of stainless steel (1.4301)

Viscosity at nominal flow rate

- at operating temperature: $\nu < 280 \; \text{SUS}$
- start-up viscosity: v_{max} eq
- v_{max} equivalent to the permitted pump inlet pressure (refer to diagram D), Δp to be determined as a function of the viscosity (take pressure loss in connection lines into account!)

Mounting position

Optional; versions equipped with bypass valve preferably in horizontal position. Under all operating conditions (min. oil level, max. inclination) the suction must occur under the oil level.

Quality Assurance

Quality manag	gement according to DIN EN ISO 9001	ISO 3968 ISO 16889	Evaluation of pressure drop versus flow characteristics Multi-Pass-Test (evaluation of filter fineness and				
To ensure consta filter elements ur ISO standards:	Int quality in production and operation, ARGO-HYTOS ndergo strict controls and tests according to the following	ISO 23181	dirt-holding capacity) Determination of resistance to flow fatigue using high viscosity fluid				
ISO 2941 ISO 2942	Verification of collapse/burst pressure rating Verification of fabrication integrity (Bubble Point Test)	Various quality controls during the production process guarantee the leakfree function and solidity of our filters.					

Our engineers will be glad to advise you in questions concerning filter application, selection as well as the cleanliness class of the filtered medium attainable under practical operating conditions.
