

Our best surface protection

The new zinc-nickel (Zn-Ni) plating for our valves and blocks offers superior corrosion resistance, protecting your equipment significantly longer than other commercially available plating technologies.

- ▶ Zn-Cr3 (240 h nSST*)
- ▶ Zn-Ni (520 h nSST*)
- ▶ Zn-Ni^{plus} (1000 h nSST*)

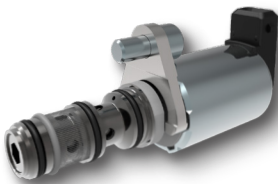

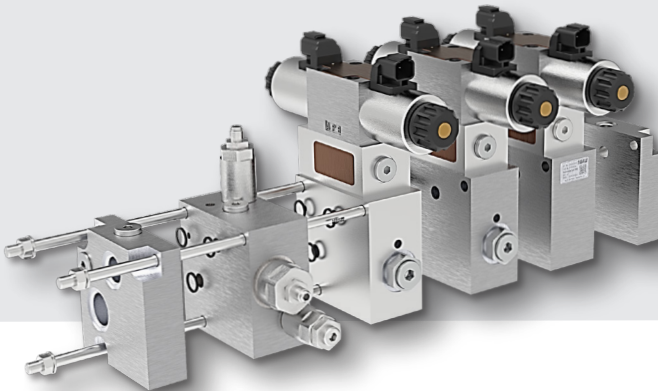

*nSST – Neutral Salt Spray Test acc. to ISO 9227

Three different types of surface protection designed for all types of environmental conditions to fulfill all needs across the market. According to ISO 9227 240 h / 520 h and 1000 h of nSST (Neutral Salt Spray Test).

We go beyond the limits.
We are ARGO-HYTOS!

Advantages of the ARGO-HYTOS surface protection

- › Premium corrosion resistance
- › Three different surface protection options (Zinc-Chromate, Zinc-Nickel, Zinc-Nickel^{plus})
- › Extended service life
- › Less frequent maintenance
- › Reduced warranty claims for manufacturers
