OPCom Portable Oil Lab

New versions

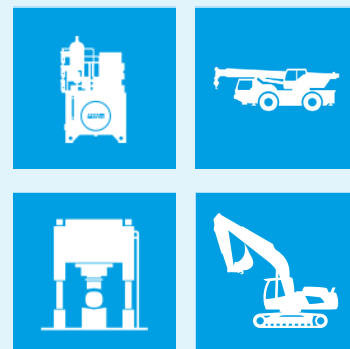

More possibilities

Mobile oil laboratory - easy, compact and cost-efficient

The OPCom Portable Oil Lab is a mobile oil laboratory that can be used for quick and reliable measurement of the oil cleanliness class and oil condition in hydraulic and lubrication systems. Sampling can be carried out directly via a pressure line or via the integrated pump. Measurement can be performed either manually or automatically in an adjustable time interval.

This product is ideal for
the following applications:

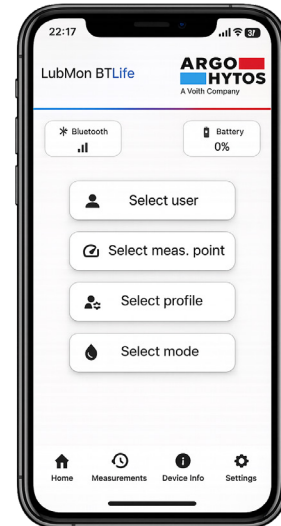

OPCOM PORTABLE OIL LAB

Comprehensive fluid diagnosis. Wherever you need!

Benefits

- Reliable oil condition monitoring
- Quick reporting
- Compact and robust design
- Biodiesel-compatible variants **NEW!**
- With Bluetooth connectivity **NEW!**
- User- friendly data management APP **NEW!**

New variants available

OPCom Portable Oil Lab is now available in new versions. The **Diesel & Biodiesel** variant enables reliable oil analysis in fuel-based applications, while the new **Bluetooth** option allows wireless operation via a mobile app for fast measurements and instant report generation – making oil condition monitoring even more convenient and efficient.

User-Friendly Mobile APP

The dedicated LubMon BTLite app enables wireless measurements, instant oil condition analysis and professional PDF report generation. Create branded reports with your logo, machine photos and operator details, then share them with customers in just a few taps.

Improve oil condition management, reduce downtime and increase maintenance efficiency!
